

PORTRAIT OF THE GALLERY

PORTRAIT OF THE GALLERY GAM | Galerie Obrist am Museum

Program

The gallery was founded by art historian Torsten Obrist in March 2000 in Essen. In 2006 the gallerist started a companionship with art manager Juri Czyborra. The gallery then moved to the new and huge location very close to the Museum Folkwang, where the gallery is situated still now.

On 300 sqm of exhibition space the gallery holds 7-8 exhibitions a year with works of both national and international artists. The emphasis is on dealing and communicating of contemporary painting, drawing, sculpture, and photography. In continual and personal collaboration with the artists the gallery conveys their work in regular single exhibitions, publications and fairs.

The program is aligned on the work of artists, who are concerned with basic questions on art. The focus is on art, that deals with art's inherent problems, art reception and art communication, as well as art, that questions the function of art in our society; art positions, which inspire a dialogue in conscious perception of our times.
